802 349-7980

We specialize in designing and building intricate, custom residences with unique building requirements from framing to finish work. As a team, we have over 20 years experience building large, complex residential and commercial projects requiring efficiency and expertise to keep pace with demanding time constraints.

Skills and Experience

We excel at applying math to solve difficult building problems to ensure accuracy while saving time and materials. For example, the compound cuts required to create complex geometric shapes can be determined before the saw enters the wood.

- ❖ Designed and built Energy Star rated, Arts and Crafts style house combining state-of-the-art building techniques and materials with extraordinary craftsmanship and architectural details. Construction methods and details include: conical ceiling, drain plane, elliptical light well, curvilinear walls, aluminum and hardwood circular stairway, custom designed and milled trim, radial porch and more.
- ❖ Elements designed and built, or built from blue prints:
 - Circular, free-standing stairs
 - Paneled rooms
 - Coffered ceilings
 - Cone roofs
 - Onion domes
 - Cabinets and built-ins
 - Fireplace mantles
 - Eyebrow dormers
 - Custom trim and millwork
 - Curved and radius work (including interior and exterior trim)
 - Furniture and light fixtures
 - Entrances and doors
 - Timber framing, Adirondack Stick Work

- ❖ Commercial Projects
 - Middlebury College Science Building
 - Woody's Restaurant
 - Westport Yacht Club

- ❖ Projects with Northern Vermont Architects
 - Truex Cullins
 - John Anderson
 - Peter Morris
 - Brad Rabinowitz
 - Edgecomb
 - Turner Brooks
